(a) *Inland transportation from EXW/port of entry/border point, Insurance and incidentals.*

Inland transportation, insurance, and other incidental costs for delivery of the goods from EXW/port of entry/border point to Project Site named in the **BDS** will be computed for each Bid by the PA on the basis of published tariffs by the rail or road transport agencies, insurance companies, and/or other appropriate sources. To facilitate such computation, Bidder shall furnish in its Bid the estimated dimensions and shipping weight and the approximate EXW or as per applicable INCOTERM value of each package. The above cost will be added by the Procuring Agency to EXW or as per applicable INCOTERM price.

(b) *Delivery schedule.*

i) The Procuring Agency requires that the goods under the Invitation for Bids shall be delivered (shipped) at the time specified in the Schedule of Requirements. The estimated time of arrival of the goods at the Project Site will be calculated for each Bid after allowing for reasonable international and inland transportation time. Treating the Bid resulting in such time of arrival as the base, a delivery "adjustment" will be calculated for other Bids by applying a percentage, specified in the **BDS**, of the EXW or as per applicable INCOTERM price for each week of delay beyond the base, and this will be added to the Bid price for evaluation. No credit shall be given to early delivery.

Or

ii) The goods covered under this invitation are required to be delivered (shipped) within an acceptable range of weeks specified in the

Deputy Director

Schedule of Requirement. **No credit will be given to earlier deliveries, and Bids offering delivery beyond this range will be treated as non-responsive.** Within this acceptable range, an adjustment per week, as specified in the **BDS**, will be added for evaluation to the Bid price of Bids offering deliveries later than the earliest delivery period specified in the Schedule of Requirements.

Or

- (iii) The goods covered under this invitation are required to be delivered (shipped) in partial shipments, as specified in the Schedule of Requirements. Bids offering deliveries earlier or later than the specified deliveries will be adjusted in the evaluation by adding to the Bid price a factor equal to a percentage, specified in the **BDS**, of EXW or as per applicable INCOTERM price per week of variation from the specified delivery schedule.

(c) *Deviation in payment schedule.*

- i) Bidders shall state their Bid price for the payment schedule outlined in the **SCC**. Bids will be evaluated on the basis of this base price. Bidders are, however, permitted to state an alternative payment schedule and indicate the reduction in Bid price they wish to offer for such alternative payment schedule. The Procuring Agency may consider the alternative payment schedule offered by the selected Bidder.

Or

- ii) The **SCC** stipulates the payment schedule offered by the Procuring Agency. If a Bid deviates from the schedule and if such deviation is considered acceptable to the

SIKANDAR ABBAS
Deputy Director
Pakistan Telecom Authority
Headquarters, Sector F-5/1,
Islamabad

Procuring Agency, the Bid will be evaluated by calculating interest earned for any earlier payments involved in the terms outlined in the Bid as compared with those stipulated in this invitation, at the rate per annum specified in the **BDS**.

(d) Cost of spare parts

i) The list of items and quantities of major assemblies, components, and selected spare parts, likely to be required during the initial period of operation specified in the **BDS**, is annexed to the Technical Specifications. The total cost of these items, at the unit prices quoted in each Bid, will be added to the Bid price.

Or

ii) The Procuring Agency will draw up a list of high-usage and high-value items of components and spare parts, along with estimated quantities of usage in the initial period of operation specified in the **BDS**. The total cost of these items and quantities will be computed from spare parts unit prices submitted by the Bidder and added to the Bid price.

Or

iii) The Procuring Agency will estimate the cost of spare parts usage in the initial period of operation specified in the **BDS**, based on information furnished by each Bidder, as well as on past experience of the Procuring Agency or other Procuring Agency's in similar situations. Such costs shall be added to the Bid price for evaluation.

(e) Spare parts and after sales service facilities in Pakistan

the minimum service facilities and parts inventories, as outlined in the **BDS** or elsewhere in the Bidding Documents, if quoted separately, shall be added to the Bid price.

(f) Operating and maintenance costs

Since the operating and maintenance costs of the goods under procurement form a major part of the life cycle cost of the equipment, these costs will be evaluated in accordance with the criteria specified in the **BDS** or in the Technical Specifications.

(g) Performance and productivity of the equipment.

- (i) Bidders shall state the guaranteed performance or efficiency in response to the Technical Specification. For each drop in the performance or efficiency below the norm of 100, an adjustment for an amount specified in the **BDS** will be added to the Bid Price, representing the capitalized cost of additional operating costs over the life of the plant, using the methodology specified in the **BDS** or in the Technical Specifications.

Or

- (ii) Goods offered shall have a minimum productivity specified under the relevant provision in the Technical Specifications to be considered responsive. Evaluation shall be based on the cost per unit of the actual productivity of goods offered in the Bid, and adjustment will be added to the Bid price using the methodology specified in the **BDS** or in the Technical Specifications.

	35.2	<p>The Procuring Agency may adopt the Quality & Cost Based Selection Technique due to the following two reasons:</p> <ol style="list-style-type: none"> i. Where the Procuring Agency, in addition to the mandatory requirements and mandatory technical specifications, requires parameters specified in Evaluation Criteria to be evaluated while determining the quality of the goods: <p>In such cases, the Procuring Agency may allocate certain weightage to these factors as a part of Evaluation Criteria, and may determine the ranking of the bidders on the basis of combined evaluation in accordance with provisions of Rule 2(1)(h) of PPR-2004.</p>

the Procuring Agency shall perform price analysis either during determination of Most Advantageous Bid or as a part of the post-qualification process. The following process shall apply:

(a) The Procuring Agency may reject a Bid if the Procuring Agency has determined that the price in combination with other constituent elements of the Bid is abnormally low in relation to the subject matter of the procurement (i.e. scope of the procurement or ancillary services) and raises concerns as to the capability and capacity of the respective Bidder to perform that contract;

(b) Before rejecting an abnormally low Bid the Procuring Agency shall request the Bidder an explanation of the Bid or of those parts which it considers contribute to the Bid being abnormally low; take account of the evidence provided in response to a request in writing; and subsequently verify the Bid or parts of the Bid being abnormally low;

Guidance for Procuring Agency:

In order to identify the Abnormally Low Bid (ALB) following approaches can be considered to minimize the scope of subjectivity:

(i) Comparing the bid price with the cost estimate;

Deputy Director
Pakistan Telecom Authority
Headquarters, Sector F-5/1,
Islamabad

		<p>(ii) Comparing the bid price with the bids offered by other bidders submitting substantially responsive bids; and</p> <p>(iii) Comparing the bid price with prices paid in similar contracts in the recent past either government- or development partner-funded.</p>
	36.2	The Procuring Agency will determine to its satisfaction whether the Bidder that is selected as having submitted the most advantageous Bid is qualified to perform the contract satisfactorily, in accordance with the criteria listed in ITB 13.3.
	36.3	The determination will take into account the Bidder's financial, technical, and production capabilities. It will be based upon an examination of the documentary evidence of the Bidder's qualifications submitted by the Bidder, pursuant to ITB 13.3, as well as such other information as the Procuring Agency deems necessary and appropriate. Factors not included in these Bidding Documents shall not be used in the evaluation of the Bidders' qualifications.
	36.4	<p>Procuring Agency may seek "Certificate for Independent Price Determination" from the Bidder and the results of reference checks may be used in determining award of contract.</p> <p>Explanation: The Certificate shall be furnished by the bidder. The bidder shall certify that the price is determined keeping in view of all the essential aspects such as raw material, its processing, value addition, optimization of resources due to economy of scale, transportation, insurance and margin of profit etc.</p>
	36.5	An affirmative determination will be a prerequisite for award of the contract to the Bidder. A negative determination will result in rejection of the Bidder's Bid, in which event the Procuring Agency will proceed to the next ranked bidder to make a similar determination of that Bidder's capabilities to perform satisfactorily.

1	<i>Non-Intrusive Scanning Tool</i>	01	01 Weeks after signing of Contract. Completion (i.e. installation, commissioning) time shall be Four (04) weeks after the delivery]

Technical Requirement

The tool is required to perform continuous non-intrusive scanning of publicly available infrastructure. The required solution should be able to automatically prioritize the risk and issues discovered based on issue severity and the systems' value at risk. The solution should give accurate, non-invasive visibility into security posture of an organization and then ranks vulnerabilities in order of priority. The solution should offer custom-fitted risk action plans to mitigate/fix issues.

Sr#	Description	Compliant (Yes/No)	Doc Ref
Proposed Solution must be able to:			
1	The solution should be able to maintain a continuous inventory of the enterprise internet surface, discovering systems using supervised machine learning algorithms that mine enterprise systems from the internet through examination of data collected from analysis of global domain and netblock registration databases, internet crawling, and subsidiary analytics and continuously monitor and quantify entities/third party/vendors security risk in a non-intrusive way. Detailed IT Profiling including but not limited to Hosts, Domains, Networks, Hosting Providers - 3rd & 4th Party, Hosting Geo location.		
2	Evaluate security profiling measures in place and validate control effectiveness. Intersect threat event information through multiple threat intel sources including but not limited to Shodan port scan.		
3	Determine system risk value based on the system sensitivity and potential for data at risk in an automated & continuous way. Automatically determine system risk value as a function of System Data Types, Presence of authentication, System Subject based on an analysis of system code, content and configuration. Maintain current knowledge of the software operating on entities/third party/vendors systems. When a critical vulnerability emerges, query the entities/third party/vendors software inventory for systems running the vulnerable software. Prioritize triage efforts towards third parties known to be exposed to the critical vulnerability.		
4	The solution should discover issues present in an enterprises' Internet-facing systems and their operations through open-source intelligence and analytics and assigns each issue a severity rating of Critical, High, Medium, or Low using the Common Vulnerability Scoring System (CVSS). The solution should assign its own severity rating for issues where a CVSS rating is not available. The solution should provide issue severity

 Deputy Director
 Pakistan Telecom Authority
 Headquarters, Sector F-5/1,
 Islamabad

	information with all issue details for each finding and it should allow to navigate from high level score to low level issue score.		
5	The solution should be able to determine the value at risk (asset value) of a system based on deep analytics of the code, content, and configuration of each Internet-facing system. Through these analytics, solution should be able to discover the types of data each system collects. The analytics should focus on identifying the form fields of every web page and using machine learning models to determine the types of data it collects. Systems that collect sensitive data such as user credentials, email addresses, credit card numbers, and so forth should be rated as High asset value. Systems that collect no sensitive information should be given a lower rating. The system should also be able to use other characteristics for determining asset value which are not described here.		
6	The solution should allow to define risk structure in portal and ability to customize Admin dashboard based on risk structure		
7	The solution should have an option to configure Alert policy for each inherent risk tiers		
8	There should be a capability to share remediation plans within team or suppliers/vendors with complete knowledge base containing descriptions, prioritization and recommended actions for individual findings		
9	The system must have capability to mark some assets as key assets.		
10	The solution should identify and flag systems of no risk-concern and be able to suppress all subsequent findings (i.e. provide the ability to create an "ignore list" for insignificant assets or insecure-by-design items such as honeypots).		
11	The solution should provide an immutable score based on objective assessments and ensure that even though the score itself is a single source of truth and cannot be changed, workflows, responses, and alerting can be configured in a manner to ensure that findings regarded as essential can be incorporated into		

	the workflow automatically and findings that should be ignored can easily be removed from the workflow. If you comply, please explain and provide document which clarify and describes how you meet this requirement		
12	The solution's false positive rate should be less than 1%.		
13	Regularly update each entities/third party/vendors 's assessment		
14	The solution should enable online sharing of findings and collaboration with third parties/licensees.		
15	The solution should be able to track progress such as remediation status, potential false positives, compensation controls, etc.		
16	Provide assistance to third parties/ Licensees as and when required by procuring agency.		
17	The solution should allow to download supporting evidence in csv and pdf format.		
18	The dashboard should be dynamic and should be customizable based on risk structure.		
19	The solution should provide the ability to perform ad-hoc searches across entire data set of third parties/licensees IT and security configurations.		
20	The solution should provide report builder feature and be able to build reports for various ad-hoc requirements		
21	The solution should support simultaneous scanning of minimum 10 profiles of third parties/licensees etc.

Price Schedule Forms

[The Bidder shall fill in these Price Schedule Forms in accordance with the instructions indicated. In information systems procurement, the Contract Price (and payment schedule) should be linked as much as possible to achievement of operational capabilities, not just to the physical delivery of technology]

Preamble:

Procuring agency should highlight any special requirements of the Information System and Contract in a Preamble to the Price Schedules. The following is an example of one such preamble;

1. The Price Schedules are divided into separate Schedules as follows:
 - i. Supply and Installation Cost Sub-Table(s)
2. The Schedules do not generally give a full description of the information technologies to be supplied, installed, and operationally accepted, or the Services to be performed under each item. However, it is assumed that Bidders shall have read the Technical Requirements and other sections of these Bidding Documents to ascertain the full scope of the requirements associated with each item prior to filling in the rates and prices. The quoted rates and prices shall be deemed to cover the full scope of these Technical Requirements, as well as overhead and profit.
3. If Bidders are unclear or uncertain as to the scope of any item, they shall seek clarification in accordance with the Instructions to Bidders in the Bidding Documents prior to submitting their bid.

Pricing

4. Prices shall be filled in indelible ink, and any alterations necessary due to errors, etc., shall be initialed by the Bidder. As specified in the Bid Data Sheet, prices shall be fixed and firm for the duration of the Contract.
5. Bid prices shall be quoted in the manner indicated and in the currencies specified in ITB Clauses 15. Prices must correspond to items of the scope and quality defined in the Technical Requirements or elsewhere in these Bidding Documents.
6. The Bidder must exercise great care in preparing its calculations, since there is no opportunity to correct errors once the deadline for submission of bids has passed. A single error in specifying a unit price can therefore change a Bidder's overall total bid price substantially, make the bid noncompetitive, or subject the Bidder to possible loss. The Procuring Agency will correct any arithmetic error.
7. Payments will be made to the Supplier in the currency or currencies indicated under each respective item. As specified in ITB Clause 15.1 (ITB Clause 28.1 in the two-stage SBD), no more than three foreign currencies may be used. The price of an item should be unique regardless of installation site.
