Sameer Sharma
Senior Advisor
ITU Bangkok

Content

➢ Overview of ITU's work on ICT statistics and use of ITU's data

➢ ICT Development Index (IDI)

➢ ITU Questionnaires

➢ National Coordination

➢ ICT measurement in Pakistan

➢ Conclusions

Capacity Building on ICT Statistics

- Resolution 8 on Collection and Dissemination of Information and Statistics, calls on ITU to "provide technical assistance to the relevant national authorities for the collection and dissemination of ICT statistics…"

- ITU is the official source for global ICT statistics. It relies primarily on information provided by Member States, and had the mandate to strengthen the capacity of member administrations.

Workshop Participants Profiles

- Participants representing Ministries (ICT, Education, Planning and others), Regulatory Bodies, National Statistical Office, Telecommunication Service Providers, etc.

- Special invitation to National ICT statistics focal points from the Ministry/Regulator and the National Statistical Office

Workshop Objectives

- To strengthen the capacity Pakistan, particularly its national ICT statistics focal points to collect, produce, analyze, utilize and disseminate national indicators and statistics on telecommunication/ICT

- To have a better understanding of:

➢ ITU's work on and use of ICT statistics

➢ ITU data collection and questionnaires

➢ ICT Development Index (IDI)

- To improve national coordination on ICT statistics in Pakistan

Seminar structure

- Introduction of participants and speakers
- Presentation of the agenda
- ITU presentations, followed by:
  - Q&A and roundtable discussions
- Presentations of Pakistan's work on ICT statistics
- Conclusions

Wishing us all an open, productive and successful seminar
