

**Replies to Queries Raised on Pre-Qualification Process for Web  
Management System – 20<sup>th</sup> March 2018**

S. No	Reference	Query	Response
1	Nil	List and Bandwidth of SSL protocol based of interest, which requires decryption	All encrypted protocols being used on internet will have to be accounted for. Regarding bandwidth prequalified vendor has to conduct its own audit for designing of the system. For the purpose PTA has been amply empowered under section 37 of PECA.
2	Nil	Does PTA have a certificates authority to decrypt SSL private traffic (e.g. Facebook, WhatsApp etc.?)	
3	Nil	Do PTA have any contract with SSL based websites like Facebook, Google, YouTube, etc. to decrypt their traffic? If yes, does PTA have their respective public keys which can be integrated in the propose SSL interception solution.	PTA requires the system to work independently regardless of any contract with social media platforms.
4	Nil	Is PTA maintaining URL list for following categories? <ul style="list-style-type: none"> <li>· Blasphemous</li> <li>· Anti-State</li> <li>· Indecent or Immoral etc.</li> </ul>	The system to be deployed is required to be self learning as well as to be updated viz a viz the list of these online content categories.
